Professional Summary

- Computer Science undergraduate at SR University with strong skills in software development, machine learning, cloud technologies, and problem-solving. Hands-on experience in designing and deploying real-world projects using Python, TensorFlow, PyTorch, React.js, Node.js, and MongoDB. Developed AI-driven solutions achieving 92% emotion classification accuracy, 97.4% fake-account detection accuracy, and a 40% reduction in inference latency. Certified in Microsoft Azure AI Engineer (AI-102), AWS Data Engineer (DEA-C01), and AWS Cloud Practitioner, with a passion for building scalable, data-driven applications and continuously learning emerging technologies.

Education

- **Bachelor of Technology in Computer Science & Engineering - CGPA: 8.1 / 10** *2023 – Present*
  SR University, Warangal
- **Intermediate (Class XII — Science: Mathematics, Physics & Chemistry))** *2021 – 2023*
  Narayana Junior College, Telangana

Technical Skills

- **Languages & Databases:** Python, C, SQL, MySQL, HTML, CSS
- **Frameworks & Libraries:** TensorFlow, PyTorch, Scikit-learn, NumPy, Pandas, Matplotlib, OpenCV
- **Web & Backend:** React.js, Node.js, Express.js, Flask, REST APIs, MongoDB
- **Tools & Platforms:** Git, GitHub, VS Code, Postman, Socket.IO
- **Domains:** Machine Learning, Deep Learning, Computer Vision, Explainable AI (XAI), Generative AI
- **Interpersonal:** Cross-functional Collaboration, Written and Verbal Communication, Deadline Management

Technical Projects

- **Real-Time Emotion Detection Using Deep Learning** *April 2026*
  Personal Project | TensorFlow, OpenCV, CNN
  – Designed and trained a CNN-based emotion recognition model that classifies **7 emotion categories** at **92% accuracy** with live webcam inference running at **30 fps**.
  – Optimized model architecture to reduce inference latency by **40%**, enabling real-time predictions on standard consumer hardware without GPU acceleration.
- **Air Pollution Forecasting Using CNN+LSTM Models** *November 2025*
  Course Project, SR University | Deep Learning, Explainable AI (SHAP)
  – Built a hybrid CNN+LSTM model forecasting PM 2.5 concentration at **RMSE of 8.3 µg/m^3**, surpassing a standalone LSTM baseline by **18%**.
  – Applied SHAP explainability to surface the **top 5 weather drivers** of pollution, increasing model interpretability for non-technical stakeholders.
- **Fake Account Detection on Social Media** *November 2025*
  SR University | Random Forest, XGBoost, LSTM, Neural Networks
  – Architected an ensemble ML pipeline detecting fake accounts at **97.4% accuracy** across **50,000+ labeled social media profiles**.
  – Engineered **35 behavioral and metadata features** to reduce the false-positive rate to **under 2%**, improving production reliability.
- **Pothole Detection Using Hybrid Quantum Model** *September 2025*
  Real-Time Project, SR University | Deep Learning, Quantum Computing
  – Developed a quantum-hybrid deep learning pipeline for automated road defect detection, achieving **89% mean Average Precision (mAP)** across **200+ road images**.
  – Integrated variational quantum circuits to reduce model parameter count by **30%** relative to a classical CNN, cutting memory overhead.
- **Virtual Herbal Platform Using Web Development Tools** *April 2025*
  SR University | React.js, Node.js, Express.js, MongoDB
  – Delivered a full-stack AYUSH medicinal plant platform featuring a searchable database of **200+ plants**, bookmarking, and JWT-authenticated user accounts.
  – Achieved **sub-200 ms** average API response time by applying MongoDB indexing and Express.js middleware-level caching.

Internships

- **Web Development Intern** *June 2025 – July 2025*
  Micro Information Technology Services | Online
  – Built and deployed client-facing web applications across a 1-month engagement, integrating REST APIs and implementing responsive UI design across frontend and backend layers.
- **Data Engineering Virtual Intern** *February 2025 – March 2025*
  AICTE EduSkills | Online
  – Implemented ETL pipeline design patterns, data warehousing strategies, and cloud-based data workflows as part of the AICTE–EduSkills industry certification program.

Achievements

- **Semester Topper — SR University** *August 2025*
  – Ranked **Semester Topper** in CS Artificial Intelligence & ML, placing in the **top 1%** of the department cohort (2024–25).
- **Smart India Hackathon 2025 (Internal Round)** *September 2025*
  – Delivered a functional prototype within a **24-hour** sprint as part of a cross-functional team at Internal SIH 2025.
- **AINCAT-2025 Certified** *May 2025*
  – Cleared the national-level AINCAT-2025 assessment, validating applied AI/ML knowledge and industry readiness.

Certifications

- **Azure AI Engineer Associate (AI-102)** *Microsoft | August 2025*
- **Azure AI Fundamentals (AI-900)** *Microsoft | March 2025*
- **AWS Certified Data Engineer — Associate (DEA-C01)** *Amazon Web Services | November 2025*
- **AWS Certified Cloud Practitioner** *Amazon Web Services | September 2025*
- **Introduction to Generative AI Studio** *Google | June 2025*
- **Technology Job Simulation** *Deloitte | June 2025*
- **Python Full Stack Development** *Edu Skills | June 2025*
